## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jackson, US Design Patent Des. 246,282 in view of Skelton, US Design Patent Des.119,400. See attached figure.

Jackson provides a hand implement in the form of a knife handle intended to be used with a blade; and a handle comprising a main body portion; and an appendage support member projecting laterally from the main body portion, the appendage support member comprising a top surface that provides a concave recess wherein a principle axis of the concave recess passing through a center of curvature and inherently having a vertex of the concave recess is substantially perpendicular to and offset from a centerline of the main body portion, and the appendage support member having a substantially continuous convex shaped surface over a majority of the bottom surface to provide an ergonomic support

surface for an appendage of a user. The device is capable of functioning in the manner claimed.

Jackson provides the claims invention except explicitly teaching of the knife blade attached to the handle. Skelton teaches the general concept of an ergonomically shaped handle grip with a knife blade attached thereto, as well known in the art. It would have been obvious to make such a modification to Jackson, for the purpose of allowing the device to function with a knife blade, as intended.
